

SYNERGY Quick Startup Guide

Installation

Step 1. Plug your SYNERGY drive into your computer using either the USB or 1394 cable.

Note: it is recommended that you use the 1394 connection if you have one available on your computer. This is a faster connection than USB and it frees up a USB port for your software key.

1394 Cable

USB Cable

Step 2. You will now have another drive on your computer called SYNERGY. Go to “My Computer” and find your new SYNERGY drive. Double-click on the SYNERGY drive.

Step 3. Double-click on “SYNERGY Install” and follow the on-screen instructions.

Step 4. (This step applies to Windows 2000 users only). Double-click on Win2K.

When the installation is complete, you will have a SYNERGY icon on your desktop and one in your Programs.

SYNERGY Program Startup

Step 1. Plug in your software key (i.e., dongle) into a USB port. This is the little green thing.

Step 2. Double-click on the SYNERGY icon to launch the program.

Step 3. From the Main Menu, click on “Patient Management”. Here you can add patient names. You must have at least one name to use the “Digital Homeopathy” program (Bugs Bunny is loaded as a default patient).

Note: if you need help using SYNERGY, click on the ? in the upper right-hand corner of the screen for help.
